Description

Overview:

When logging into the application using the problem_user account, the product catalog renders incorrect/broken image assets for multiple inventory items, and certain interactive elements (such as item removal and checkout fields) fail to function properly.

Pre-conditions:

- Navigated to <https://www.saucedemo.com/>
- Valid user credentials for problem_user available

Steps to Reproduce:

1. Go to the Swag Labs login page.
2. Enter Username: problem_user
3. Enter Password: secret_sauce
4. Click on the **Login** button.
5. Observe the product catalog grid on /inventory.html.

Expected Result:

Each product should display its corresponding unique item image (e.g., Sauce Labs Backpack image for the Backpack item).

Actual Result:

All products in the catalog render the same placeholder/puppy image (/static/media/sl-404.168b1cce.jpg), failing to display the correct product visuals.
